# Welcome to George's Garden Center, trusted suppliers of wholesale priced nursery plants in Perth, Western Australia for over 50 years

At our Garden Center we have a wide range of plants to suit any situation. Our prices may be low, but our plants and customer service are top quality. As a family owned business with over 50 years of combined experience, we are dedicated to helping our customers create a stunning garden well within their budget.

Cacti

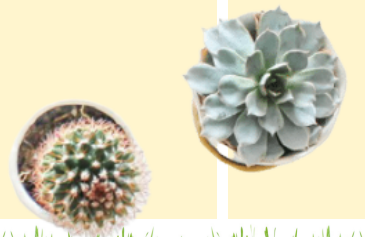

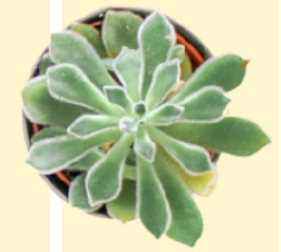

Plants

Succulents

George is the Camellia and Azalea specialist in Perth and our passion and enthusiasm means that we are continuously expanding our range, to bring you the latest released plants. By bringing wholesale prices to the public, those purchasing plants from us to use in their new home's landscaping can spend half the price (in comparison to a normal nursery) and use the money saved for other essentials, such as reticulation and fencing.

Take your time to browse our selection, and afterwards relax with a cup of coffee or a Devonshire tea.

With the money you can save, it is worth visiting George's Garden Center.

## About George's Garden Center

We are a family run business with 50 years in the nursery industry. Grower direct means you pay wholesale prices saving you money, no ABN required. As well as growing and selling a huge range of plants, we are also importers of pots and ornaments - cutting out the middleman and buying containers of brand new products, to sell direct to the public. We also grow and sell deciduous trees.

With a combined experience of 145 years you can get professional advice from one of our knowledgeable staff. Our expertise is second-to-none, with knowledge available on all sorts of plants, species and varieties, whether you need to know about growing conditions, soil types, or landscaping advice.
